### **IQ Hong Kong, Ltd Announces Launch of the Apollo II Headlamp**

*The powerful Apollo II is unparalleled in quality and versatility*

Tsuen Wan, N.T. Hong Kong (November 28, 2005)- IQ Hong Kong, a leading designer and manufacturer of precision flashlight and writing products, today unveiled their new Apollo II Headlamp, the HL8. The HL8 is IQ's brightest and most versatile headlamp, and builds upon the company's other widely popular headlamp models.

The HL8 features a state of the art 1-Watt Luxeon LED. A single Luxeon LED light is brighter than conventional bulbs and focuses better than a cluster of 5 standard LED lights. Also, the HL8's digital rotary dimmer allows the light beam to be continuously adjusted through an entire range of intensities- from the lowest survivor mode to the highest power. The new hinge feature provides the beam to be angled in numerous directions, and the battery pack is located in the back for a balanced weight.

"We took great care in developing this new addition to our headlamp family," states Anmena Yau, IQ's Managing Director. "It was not only designed to meet the rigorous needs of industry professionals, mountaineers, backpackers, and climbers, but also for ease in every day use."

Founded in 1996, IQ Hong Kong ([www.ighk.com](http://www.ighk.com)) is a leading designer, manufacturer, and exporter of cutting edge LED products. The company's offices are located in Tsuen Wan, N.T., Hong Kong, and may be reached by phone (852) 2413-6236, fax (852) 2413-6369, or via email at [sales@ighk.com](mailto:sales@ighk.com).
